

IV. ASSIGNMENT RECOMMENDATION: 1. STRONGEST QUALIFICATION: Technical expertise
 2. SUGGESTED JOB (Include AFSC): Data Processing Installation Chief, AFSC 5155
 3. ORGANIZATION LEVEL: Wing 4. TIMING: FY85

V. EVALUATION OF POTENTIAL:

Compare the ratee's capability to assume increased responsibility with that of other officers whom you know in the same grade. Indicate your rating by placing an "X" in the designated portion of the most appropriate block.

VI. RATER COMMENTS Lt Ragan's depth of knowledge in the computer sciences has been key to this branch during these past 10 months of "gearing up" for the implementation of Phase IV. His expertise in Computer Performance Measurement insured accurate and comprehensive USAFE inputs to this year's MAJCOM Computer Automated Projection (MCAP). While working on the MCAP, Lt Ragan instilled in subordinates an in-depth, working knowledge of the many lengthy, highly technical manuals involved in its preparation, thereby strengthening their analytical abilities - an accomplishment that continues to benefit this branch daily. Lt Ragan readied himself for the imminent implementation of the Phase IV computers through an extensive course of instruction on the Sperry 1100/60 computer, making himself the command's singularly most knowledgeable person in the concepts and architecture of the Sperry 1100/60. Also completed the Air Force's On-the-Job Training Supervisor Course. Lt Ragan has expressed an avid desire to become a Data Processing Installation (DPI) Chief. As a former DPI Chief, I can state unequivocally that Lt Ragan has the experience, technical background, and managerial ability to be a superior DPI Chief. I vigorously endorse him for the position. Promote.

VII. ADDITIONAL RATER COMMENTS CONCUR NONCONCUR
 Lt Ragan has proven himself to be a highly capable junior officer. He analyzed and justified a \$1.5M Data Automation Requirement to obtain local data storage capability for the bases' wartime critical remote terminals. Implementation of this requirement gives base-level remote terminal users the capacity to store and forward data in the event communications or host computers are destroyed, adding immeasurably to the wartime sustainability of our forces. His exhaustive efforts and distinctive accomplishments prove his potential for greater responsibility. Promote.

VIII. INDORSER COMMENTS CONCUR NONCONCUR
 Lt Ragan's wealth of expertise makes him one of my most valuable assets for our conversion to new Phase IV base level computers. He identified deficiencies in the Air Training Command's training program, assured course changes, and obtained an additional 250 training quotas to support USAFE's implementation of Phase IV. I strongly recommend Lt Ragan for an advanced academic program in computer science. Promote.
